

## IHCC Members

Just a quick note to keep you abreast of our discussions during our Pre-ES&H Forum meetings November 13-14, 1995. The following members/alternates/representatives were present:

Cheryl Floreen	(208) 526-0874	(208) 526-1926
Harvey Grasso	(510) 637-1610	(510) 637-2078
Monty Herr (LLNL)		
Paul Knight	(509) 376-6856	
Jay Larson, CIH	(301) 903-9869	(301) 903-7047
Dustin Simonson (R. F. Weston)		
Lakshmi P. Singh	(803) 725-3962	(803) 725-3376
James Slawski, DP-311	(301) 903-5464	(301) 903-7065
Janet Torma-Krajewski	(303) 966-7165	(303) 966-4763

## IHCC-RCCC- ES&HC Relationships

The Radiological Control Coordinating Committee (RCCC) proposed that it and committees like the IHCC be sponsored by and report to the ES&HC.

IHCC discussions concluded that we should have the following relationship with the council:

- \*An independent standing committee with its own Mission, Vision and Strategic Plan.
- \*Chairman attends ES&HC briefing the Council on our activities.
- \*Be a resource for the council to address IH issues.
- \*Raise issues of concern to the Council.
- \*Have members participate in ad hoc joint working

groups of members of other coordinating committees on crosscutting issues

\*Ally our selves with the Council

Dr. O'Toole addressed the RCCC and IHCC jointly. She had Gene Runkle, RCCC Chairman, and I present our respective committee's proposals as to how we will work with the ES&HC. She agreed with both committee's approach and suggested that both chairmen attend the neext ES&HC meeting (December ??) to brief the council.

She also challenged the committees to address the following issues:

- \* How we assess complex management systems that impact ES&H.
- \* How we identify risks and priorities.
- \* Work with the Necessary and Sufficient process
- \* Efficient technical proffessional training processes
- \* Make our activities add value to DOE operations
- \* Act more corporately
- \* Spend more face time with one another.
- \* Address ES&H management systems in contracts.
- \* Write communication into our jobs

#### IH Implementation Guide

L.P. Singh indicated that he had discussed the demise of th IHIG with John Moran who works with Joe Fitzgerald's office.

I indicated that Rick Jones suggested that this is not a politically good time to force the IHIG issue. It is perceived as a promoting technical stove piping. The group suggested that the IHCC send Joe Fitzgerald a letter. Itried unsuccessfully to discuss the issue with Joe F. I agreed to prepare a letter . It was suggested that the guide be renamed, Industrial Hygiene Recommended Practices.

#### IH Focal Point at HQ

The group raised the following question: With the reorganization of EH who is the focal point on IH issue? This is a question it would like to ask Joe Fitzgerald.

#### AIHA/ACGIH Database Guidelines

Monte Herr indicated that this guide is being distributed for review.

#### Reproductive Hazards

I gave attendees a copy of a John Jankovic paper titled "A Screening Method for Occupational Reproductive Health Risk".

Morris Lemmings provided me this paper. Copies will be mailed to you

#### DFNSB Remmendations and Recommendation 95-2

Mark Sautman, a DNFSB staffer, presented an overview of the board it recommendations to date and Recommendation 95-2. He provided copies of his slides, DFNSB TECH-6 and DFNSB Recommendation 95-2. Copies will be mailed to you. Finally, DFNSB recommendations are now posted on the World Wide Web at <http://www.DNFSB.gov>.

#### IHCC Conference Call

The group agreed that because of the poor attendance an IHCC conference call should be held after Thanksgiving. I propose it be held between 10:00 and 12:00 EST on 30 November. A phone number and agenda will follow.
